EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Meredith Struby (Applicant's attorney) on 12/10/2008.

The application has been amended as follows:

In the Claims:

- a. In line 5 of claim 39, "end of housing" has been deleted and replaced with --end of the housing--.
- b. In line 2 of claim 46, "journalled in the rotor" has been deleted and replaced with -journalled in a rotor--.

DETAILED ACTION

Allowable Subject Matter

2. Claims 39-91 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claim 39, the prior art when taken alone or in combination with another does not teach or fairly suggest at this time a hub drive system for a vehicle, comprising: a tubular housing suspended by the vehicle and having an inboard and an outboard end; a wheel hub rotationally mounted on the outboard end of the housing; an electric motor disposed in the

inboard end of housing; a planetary gearbox, disposed in the outboard end of the housing and driven by the motor through a hollow primary shaft; an output flange of the gearbox operatively connected to the hub; a casing for the motor; a stator in the casing; a hollow rotor rotationally mounted in the casing and operatively connected to the primary shaft of the gearbox; a gallery defined between the housing and casing and into which a lubricant for the gearbox is injectable under pressure to cool the motor; a passage in the casing to deliver lubricant still under pressure from said gallery to said hollow rotor to further cool the motor; and said rotor being arranged to deliver said lubricant still under pressure to the primary shaft to lubricate the gearbox, wherein a space between the rotor and stator is free of said lubricant. In particular, the prior art does not teach wherein the pressurized flow of lubricant flows in the path as claimed wherein a space between the rotor and stator is free of said lubricant.

Regarding claims 42 and 81, the prior art when taken alone or in combination with another does not teach or fairly suggest at this time A hub drive system for a vehicle, comprising: a tubular housing suspended by the vehicle and having inboard and outboard open ends; a wheel hub rotationally mounted through hub bearings on the outboard end of the housing; an electric motor disposed in the inboard end of the housing; a planetary gearbox, disposed in the outboard end of the housing within the radial confines of said bearings and driven by the motor through a primary shaft; an output flange of the gearbox detachably connected to the hub and closing the outboard end of the housing; wherein without removing the wheel, the motor is removable inboard of the housing and the gearbox is dismantleable primarily outboard of the housing. In particular, the prior art does not teach a hub drive system as claimed wherein without removing

the wheel, the motor is removable inboard of the housing and the gearbox is dismantable primarily outboard of the housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
